Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

NAVIGATION

🔺 Heading elements are not in a sequentially-descending order ⌄

These are opportunities to improve keyboard navigation in your application.

NAMES AND LABELS

🔺 Image elements have `[alt]` attributes that are redundant text. ⌄

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.
